

Manufacturing Process Table

Product name	Nano200
substance name	Chondroitin Sulfate Oligosaccharides

No.	Process
1	raw materials(cartilage)
2	enzyme treatment
3	clarifying filtration
4	ultra filtration
5	heat sterilization
6	subcritical water treatment
7	concentration with ultrafiltration
8	activated carbon treatment
9	spray drying
10	classification
11	metal inspection
12	measurement and packing

This product is manufactured in accordance with the health food raw materials GMP of the Japan Health and Nutrition Food Association.
